Human Connection

At a Glance

Sincere and passionate Software Engineer who thrives in a team environment. Driven and patient under challenging circumstances. Seeks to understand a problem prior to developing and executing a plan. Demonstrated eye for clean design and thoughtful user experience. My ideal role includes frontend, backend, or full stack software development.

Experience

2020

MUD Cyber Punk | Team Project

- Game application built using Django. Backend application serves a game map. Handles user creation and saves in-game player location.
- Frontend application fetches our data structures and renders it. User's can register to the game and explore the world.

2019

Riders for Life | 8 Week Developer Internship

- Developed a production-level prototype application for a Nonprofit with React, Node, and Frontline SMS..
- Built CRUD operational Administrative User Interface, configured an SMS messaging service to our backend application.

2019

React Tetris | Personal Project

- Game application with React Hooks and Styled Components.
- First exploration into using algorithms in an application.

2019

Dark Mode | Custom Hooks and Local Storage

- Setting and retrieving a storage object using a custom hook, stateful logic.
- Using a custom hook to determine whether our value is True or False.
- Set and persist a users preference for dark mode using the two custom hooks in coordination.

2016-2018

Oregon Dept. Of Human Services | Case Manager

2013-2016
+ Present

JAARL Investments | General Manager

Education

2019 - 2020

Lambda School, Online
Full Stack Web Development

2010 - 2015

South Dakota State University, Brookings, SD
B.S. Nutrition and Food Sciences
